MECHANICAL SCREENS

MINISCREEN

Filtering screw screen - Mini

The miniscreen is an integrated machine consisting of a perforated screen, a spiral screw and a geared motor unit. The screen has been specifically designed for fine screening application for waste water treatment plants.

Salient Features:

- Easy collection of the solid material in a bin or a bag.
- Low installed power.
- MOC screen and housing in SS304 and screw in CS PP powder coating.
- Suitable for small treatment plants.

Model	Nominal Flow rate m3/hr		*Power Connected
	3mm	5mm	(kW)
M01	12	18	0.37
M02	35	50	0.55
M03	45	70	0.75

* Flow rate based on 200ppm solid loading.
Flow rate may vary depending upon application and suspended solids in feed.
