SLUDGE DEWATERING

STATIC MIXER

Static Mixer (Pending Patent)

An alternate to flocculator, where sludge feed is constant with stable consistency, a specially designed static mixer can be used. A specially designed static mixer can also be used as an alternative to a flocculator for the mixing of sludge and polyelectrolyte.

Salient Features:

- Efficient mixing without requirement of electrical power or complex mixing tanks.
- Very simple and ingenious construction in SS304/316 as desired.
- Specially designed for specific application of polyelectrolyte and sludge mixing.
- Flanged ends for inlet and outlet provide for very simple installation and no requirement of continuous maintenance.

Model	Sludge Throughput
25 x 400	0.6 m3/hr
25 x 600	1.4 m3/hr
25 x 900	2.0 m3/hr
40 x 900	4.0 m3/hr
